### SUMMARY

---

Frontend Engineer with 4+ years at TVGla building content-driven websites and interactive browser experiences for HBO Max, Universal, and Lionsgate. Experience includes React and TypeScript, CMS and API integration, UI accessibility, and testing across browsers and devices.

### EXPERIENCE

---

#### Front End Web Developer | TVGla

Mar 2022 - Present

- Built reusable **React/TypeScript UI modules** for the HBO Max Toolkit and connected CMS content through GraphQL to support recurring content updates.
- Contributed to the Toolkit's Node.js publishing workflow with validation and status UI that helps editors track content through delivery stages.
- Contributed to localization work for HBO Max Partners International in Next.js, including translation integration and review support.
- Developed responsive trailer, gallery, and video features for Universal's Fast X campaign.
- Contributed Playwright and Cypress coverage for the HBO Max Toolkit and Partners International sites following CMS content updates.
- Worked with the team on mobile browser camera and 3D features, including device testing and launch support.

### SKILLS

---

**Core frontend:** React, TypeScript, JavaScript, Next.js, HTML, CSS/Sass

**UI systems & quality:** Responsive UI, reusable components, Playwright, Cypress, semantic HTML, keyboard support, browser/device testing

**Backend & web integration:** GraphQL, REST APIs, Node.js

**Interactive media:** Browser-based camera and 3D experiences
